(54)【発明の名称】 健康吸煙物

(57)【要約】

【課題】 本発明は健康吸煙物に関し、艾や香料性の天然植物又は薬用植物を成分とし、固形に形成し、それを吸い口の一端に固定し、吸い口他端から吸煙できるようにした健康吸煙物を提供することを目的とする。

【解決手段】 本発明は蓬を加工した艾に香料性の天然植物を混入させた材料や薬用植物で固形発煙体2を形成し、この固形発煙体2の一端に火を付け他端には吸い口を付けて吸煙可能に健康吸煙物1を構成する。前記固形発煙体2には一端から他端に貫通し煙りを誘導する通孔4を形成することがある。

## 【特許請求の範囲】

【請求項1】 蓬を加工した艾に香料性の天然植物、葉草又は海草を添加物として混入させて固形発煙体を形成し、該固形発煙体の端部に火を付けて吸煙可能に形成した健康吸煙物。

【請求項2】 少なくともマカ、ガラナ、カツアバ、バフィアのいずれかの薬用植物を含めて固形発煙体を形成し、該固形発煙体の端部に火を付けて吸煙可能に形成した健康吸煙物。

【請求項3】 固形発煙体の一端に带状物を巻回して带状物巻回部を設けてある請求項1又は請求項2に記載の健康吸煙物。

【請求項4】 固形発煙体には一端から他端に貫通し煙りを誘導する通孔を形成してある請求項1乃至請求項3のいずれかに記載の健康吸煙物。

## 【発明の詳細な説明】

【0001】

【発明の属する技術分野】本発明は健康吸煙物に関し、特に、吸煙することで健康の増進に繋がる物質を固形状に固め、その先端に着火し、反対側に吸い口を取り付けて吸煙するようにした健康吸煙物に係る。

【0002】

【従来の技術】禁煙用の、例えば、ハッカパイプ或いは香氣のあるハーブなどを筒状の容器に収容し、一端に空気流入用の孔を空け、他端に吸い口を連着させた禁煙パイプと言ったものが知られている。また、葉草を主成分として、これに薫香材を混ぜたものを薄紙で巻き先端に火を付けて他端から煙を吸入する健康喫煙物などが提案されている。

【0003】

【発明が解決しようとする課題】しかしながら、前記禁煙パイプは火を付けて煙を吸うものではなく、単に、独特の香りを吸い込むだけで、燃焼による燻煙の芳潤な香りや有効成分の誘引に欠けるものであり、また、紙巻き型式の健康喫煙物は紙の燃焼に伴って味、匂とも悪化し、さりとて葉巻のように製造するには、健康喫煙物にあっては適当な広葉草本も見つけ難く且つ得がたく、たとえ原料が得られたとしても製造に手間が掛かり、実行し難い欠点がある。また、マドロスパイプにより刻んだ香料性の天然植物等の煙りを吸煙することも考えられるが、マドロスパイプはきざみの詰め方が難しく、火がすぐに消えてしまいがちで、且つ、煙道の掃除も手間がかかり、極めて扱い難い。

【0004】そこで、本発明は紙巻き型式ではなく、艾（もぐさ）や香料性の天然植物を成分とし、固形に形成し、それを吸い口の一端に固定し、吸い口他端から吸煙できるようにした健康吸煙物を提供することを目的とする。

【0005】

【課題を解決するための手段】本発明は蓬を加工した艾

に香料性の天然植物を混入させた材料や薬用植物で固形発煙体を形成し、この固形発煙体の一端に火を付け他端には吸い口を付けて吸煙可能に形成して健康吸煙物を構成する。前記固形発煙体には一端から他端に貫通し煙りを誘導する通孔を形成することがある。

【0006】

【発明の実施の形態】以下、図面を参照しながら、本発明の実施の形態について詳細に説明する。図1は、本発明の一実施の形態に係る健康吸煙物の斜視図である。同図において、健康吸煙物1は艾や香料性の天然植物を成分とする筒状の固形発煙体2を有し、その一端に带状物を、例えば、紙の粘着テープを一重若しくは複数回、巻回して带状物巻回部3を設けてある。前記固形発煙体2の中心にはこの固形発煙体2の外径の約1/3の直径を有する通孔4を形成してある。図2は健康吸煙物1の背面図であり、前記通孔4は前記固形発煙体2の一端から他端に貫通している。なお、この通孔4を設けずに健康吸煙物を形成することができ、また、前記通孔4を形成する場合には、前記通孔4の直径と前記固形発煙体2の外径との比を、例えば、1/12～1/3の範囲で適宜選択して設定することができる。そして、前記带状物巻回部3を形成せずに前記健康吸煙物1を構成することもできる。

【0007】前記固形発煙体2は、例えば、蓬を加工した艾に白檀の木質材、月桂樹の葉、黒文字の木質材、菊の葉、ヘリオトロープの蕾、薔薇の蕾、ハッカの葉又は落の葉を乾燥させ細かく切った添加物のうちから一種又は数種を混入し、更に、糊料として、例えば、アルギン酸を適量加え粘性のある泥状物にし、金属棒に厚く塗り付けて乾燥させ、乾燥後前記金属棒を抜き取って固形発煙体が出来上がる。また、薄紙でほぼ前記固形発煙体2の直径と同程度の筒を用意し、一端を、例えば、紙製のキャップで塞ぎその中に前記粘性のある泥状物を満たし、その後前記筒の他端を、例えば、紙製のキャップで塞ぎ、両端のキャップに数本の針金を貫通させた状態で乾燥させ、乾燥後前記針金を引き抜くと共に前記筒を除去して前記固形発煙体を形成することもできる。こうして製作した固形発煙体の一端に前記带状物を巻回して带状物巻回部3を形成すると前記固形発煙体2が出来上がる。なお、前記固形発煙体2はマカ、ガラナ、カツアバ、バフィアその他の薬用植物や海草により形成したり、又は前記蓬を加工した艾や香料性の天然植物、動物（例えば、鹿の枝角）の骨と併用してもよい。

【0008】前記健康吸煙物1は、例えば、市販のたばこ用のフィルター付きの吸い口に前記固形発煙体2の端部若しくは前記带状物巻回部3の部分装着し、先端に火をつけてたばこを吸うのと同じ要領で吸煙する。煙りは前記通孔4を通じてフィルター側に誘導される。なお、前記带状物巻回部3を断熱材、例えば、硝子繊維で形成すれば、熱による前記吸い口の焼損が起り難くな

り、前記固形発煙体2の無駄になる部分をより少なくすることができる。

【0009】前記マカは大根と同じアブラナ科の植物でアンデスの4000m以上の山脈でも栽培可能な副作用もなく精力増強になる植物で、主に利用される部分は貯蔵機能部の役割を担う朝鮮人参のような直根と胚軸である。

【0010】前記ガラナはアマゾン地方に産するムクロジ科の蔓性高木で、カテキンという物質を含み、アルツハイマー病の誘引物質と考えられているベータアミロイドの毒性を抑制すると言われ、強壮、神経強壮、催淫などに効果があり、葉や種子が利用される。

【0011】前記カツアバはコカノキ科の植物で中南米の北部・東北部・中西部地方の広い範囲の原野に自生していて、高さ1.5m～2mの低木で黄色の花をつける。主に樹皮部分が薬用として利用され、催淫、健胃、強壮などに効果がある。

【0012】前記バフィアはヒユ科の植物で南米に広く分布し、アマゾン人参とも呼ばれているブラジル特産の\*

\*薬用植物である。根の部分を利用することが多い。

【0013】

【発明の効果】以上詳細に説明したように、本発明によれば、蓬から製した艾に香料性の天然植物を混入させたり、マカ、ガラナ、カツアバ、バフィアのいずれかの薬用植物を含めて固形発煙体を形成し、たばこ用のフィルターなどの吸い口で吸煙できるように構成したので、紙巻きたばことは違って血行を増進させたり、食欲を増進させる効果を享受でき、また、紙の燃焼による辛みを伴うことなく吸煙中に快い香りを楽しむことができる。

【図面の簡単な説明】

**CLAIMS**

---

[Claim(s)]

[Claim 1] The health smoke absorbing object which was made to mix the natural vegetation, the herb, or seaweed of perfume nature in \*\* which processed the mugwort as an additive, formed the solid emitting smoke object, attached fire to the edge of this solid emitting smoke object, and was formed in it possible [ smoke absorbing ].

[Claim 2] The health smoke absorbing object which formed solid emitting smoke objects including one medicinal herb of MAKKA, guarana, a cutlet arbor, and Pfaffia at least, attached fire to the edge of this solid emitting smoke object, and was formed in it possible [ smoke absorbing ].

[Claim 3] The health smoke absorbing object according to claim 1 or 2 which winds a band-like object around the end of a solid emitting smoke object, and has prepared the band-like object winding section.

[Claim 4] The health smoke absorbing object according to claim 1 to 3 which has formed the through-hole which penetrates from an end on a solid emitting smoke object at the other end, and guides smoke.

---

## DETAILED DESCRIPTION

---

[Detailed Description of the Invention]

[0001]

[Field of the Invention] Especially this invention hardens the matter which leads to improvement of health by carrying out smoke absorbing in the shape of a solid about a health smoke absorbing object, lights at the tip, and relates to the health smoke absorbing object which sucks up to the opposite side, attaches opening and was made to carry out smoke absorbing.

[0002]

[Description of the Prior Art] A herb with the mentha herb pipe or aroma for prohibition of smoking etc. is held in a tubed container, the hole of an airstream necessity is vacated for an end, and what was called non-smoking pipe to which it smoked to the other end and ream arrival of the opening was carried out is known. Moreover, the health smoking object which attaches fire to a gimlet-point edge for what mixed incense material with this in thin paper, and inhales smoke from the other end is proposed by using a herb as a principal component.

[0003]

[Problem(s) to be Solved by the Invention] However, said non-smoking pipe attaches fire and is not a suck thing about smoke. It is what lacks in the invitation of the \*\*\*\*\* scent of smoking, or an active principle by combustion only by only absorbing a peculiar scent. Moreover, in order for the taste and a smell to get worse with combustion of paper and to manufacture like \*\*\*\* and a cigar, manufacture will take time and effort and the health smoking object of a paper winding pattern type will have the fault which is hard to perform, even if it is hard to find a suitable forb, and it is hard to obtain and a raw material is obtained, if it is in a health smoking object. Moreover, although carrying out smoke absorbing of the smoke, such as natural vegetation of the perfume nature minced with the seaman's pipe, is also considered, how to pack a unit tends to be difficult, and fire tends to go out immediately, and cleaning of a gas duct also requires time and effort, and it is very hard to treat a seaman's pipe.

[0004] Then, it aims at offering the health smoke absorbing object which this invention used the natural vegetation of the \*\* (moxa) and perfume nature instead of a paper winding pattern type as the component, formed it in the solid, inhaled it, and fixed it to the end of opening, sucks up and could be made to carry out smoke absorbing from the other end of opening.

[0005]

[Means for Solving the Problem] This invention forms a solid emitting smoke object by the ingredient and medicinal herb which made the natural vegetation of perfume nature mix in \*\* which processed the mugwort, it attaches fire to the end of this solid emitting smoke object, is inhaled to the other end, attaches opening, forms it possible [ smoke absorbing ], and constitutes a health smoke absorbing object. The through-hole which penetrates from an end on said solid emitting smoke object at the other end, and guides smoke may be formed.

[0006]

[Embodiment of the Invention] Hereafter, the gestalt of operation of this invention is explained to a detail, referring to a drawing. Drawing 1 is the perspective view of the health smoke absorbing object concerning the gestalt of 1 operation of this invention. the tubed solid emitting smoke object 2 with which the health smoke absorbing object 1 uses the natural vegetation of \*\* or perfume nature as a component in this drawing -- having -- the end -- a band-like object -- for example, the adhesive tape of paper -- one layer or multiple times -- it winds and the band-like object winding section 3 is formed. The through-hole 4 of the outer diameter of this solid emitting smoke object 2 which has about 1/of diameters of 3 is formed in the core of said solid emitting smoke object 2. Drawing 2 is the rear view of the health smoke absorbing object 1, and said through-hole 4 is

penetrated from the end of said solid emitting smoke object 2 to the other end. In addition, when a health smoke absorbing object can be formed, without forming this through-hole 4 and it forms said through-hole 4, in  $1/12 - 1/3$ , the ratio of the diameter of said through-hole 4 and the outer diameter of said solid emitting smoke object 2 can be chosen suitably, and can be set up. And said health smoke absorbing object 1 can also be constituted, without forming said band-like object winding section 3.

[0007] Said solid emitting smoke object 2 to \*\* which processed the mugwort The woody material of a sandalwood, the leaf of a laurel, A kind or several sorts are mixed from from among the additives which were made to dry the woody material of a black alphabetic character, the leaf of a chrysanthemum, the bud of a heliotrope, a rose bud, the leaf of a mentha herb, or the leaf of a butterbur, and were cut finely. Further as a thickening agent For example, make it slime with optimum dose \*\*\*\* viscosity, and plaster a metal rod with an alginic acid thickly, it is made to dry it, the account metal rod of desiccation back to front is sampled, and a solid emitting smoke object is done. A cylinder almost comparable as the diameter of said solid emitting smoke object 2 is prepared in thin paper. Moreover, an end For example, the slime which closes with the cap made of paper and has said viscosity in it is filled. While the cap made of paper closes the other end of the account cylinder of back to front, making it dry in the condition of having made the cap of both ends penetrating several wires and drawing out the account wire of desiccation back to front, said cylinder can be removed and said solid emitting smoke object can also be formed. In this way, if said band-like object is wound around the end of the manufactured solid emitting smoke object and the band-like object winding section 3 is formed, said solid emitting smoke object 2 will be done. In addition, said solid emitting smoke object 2 may be formed by the medicinal herb and seaweed of MAKKA, guarana, a cutlet arbor, and Pfaffia and others, or may be used together with the bone of the natural vegetation of \*\* which processed said mugwort, or perfume nature, and an animal (for example, antler of a deer).

[0008] Said health smoke absorbing object 1 is inhaled with [ for commercial tobacco ] a filter, equips opening with the part of the edge of said solid emitting smoke object 2, or said band-like object winding section 3, attaches fire at a tip, and carries out smoke absorbing of the tobacco in the same way as that of the suck. Smoke is guided to a filter side through said through-hole 4. In addition, if said band-like object winding section 3 is formed with a heat insulator, for example, glass fiber, said part by heat which inhale, and burning of opening stops being able to happen easily and becomes the futility of said solid emitting smoke object 2 can be lessened more.

[0009] It is the vegetation which said MAKKA does not have the side effect which can grow even the mountain range 4000m or more in the Andes with the vegetation of the same Brassicaceae as a Japanese radish, either, and becomes energy enhancement, and the part mainly used is an axial root like a ginseng radix and the hypocotyl which play a role of a storage function part.

[0010] Said guarana is the climbing tree of Sapindaceae produced in the Amazon district, it is said to control the toxicity of the PETA amyloid considered to be the attractant of an Alzheimer disease including matter called a catechin, there is effectiveness in sthenia, nerve sthenia, aphrodisiac, etc., and a leaf and a seed are used.

[0011] Said cutlet arbor grows wild in the vegetation of Erythroxylaceae in the land of the large range of Central American northern part, northeast section, and Midwestern district, and pickles a yellow flower with a with a height [ 1.5m-2m ] shrub. A bark part is mainly used as medical use, and there is effectiveness in aphrodisiac, stomachic, sthenia, etc.

[0012] Said Pfaffia is the medicinal herb of the PURAJIRU specialty which is widely distributed over South America with the vegetation of Amaranthaceae, and is also called the Amazon ginseng radix. The part of a root is used in many cases.

[0013]

[Effect of the Invention] According to this invention, make the natural vegetation of perfume nature mix in \*\* which \*(ed) from the mugwort, as explained to the detail above, or Since it constituted so that solid emitting smoke objects including one medicinal herb of MAKKA, guarana, a cutlet arbor, and Pfaffia might be formed, the filter for tobacco etc. might suck up and smoke absorbing could be carried out by the mouth A pleasant scent can be enjoyed during smoke absorbing, without unlike a paper cigar, being able to promote circulation, being able to enjoy the effectiveness of promoting appetite, and being accompanied by the pungent condiment by combustion of paper.

## MEANS

---

[Means for Solving the Problem] This invention forms a solid emitting smoke object by the ingredient and medicinal herb which made the natural vegetation of perfume nature mix in \*\* which processed the mugwort, it attaches fire to the end of this solid emitting smoke object, is inhaled to the other end, attaches opening, forms it possible [ smoke absorbing ], and constitutes a health smoke absorbing object. The through-hole which penetrates from an end on said solid emitting smoke object at the other end, and guides smoke may be formed. [0006]

[Embodiment of the Invention] Hereafter, the gestalt of operation of this invention is explained to a detail, referring to a drawing. Drawing 1 is the perspective view of the health smoke absorbing object concerning the gestalt of 1 operation of this invention. the tubed solid emitting smoke object 2 with which the health smoke absorbing object 1 uses the natural vegetation of \*\* or perfume nature as a component in this drawing -- having -- the end -- a band-like object -- for example, the adhesive tape of paper -- one layer or multiple times -- it winds and the band-like object winding section 3 is formed. The through-hole 4 of the outer diameter of this solid emitting smoke object 2 which has about 1/3 of diameters of 3 is formed in the core of said solid emitting smoke object 2. Drawing 2 is the rear view of the health smoke absorbing object 1, and said through-hole 4 is penetrated from the end of said solid emitting smoke object 2 to the other end. In addition, when a health smoke absorbing object can be formed, without forming this through-hole 4 and it forms said through-hole 4, in  $1/12 - 1/3$ , the ratio of the diameter of said through-hole 4 and the outer diameter of said solid emitting smoke object 2 can be chosen suitably, and can be set up. And said health smoke absorbing object 1 can also be constituted, without forming said band-like object winding section 3.

[0007] Said solid emitting smoke object 2 to \*\* which processed the mugwort The woody material of a sandalwood, the leaf of a laurel, A kind or several sorts are mixed from among the additives which were made to dry the woody material of a black alphabetic character, the leaf of a chrysanthemum, the bud of a heliotrope, a rose bud, the leaf of a mentha herb, or the leaf of a butterbur, and were cut finely. Further as a thickening agent For example, make it slime with optimum dose \*\*\*\* viscosity, and plaster a metal rod with an alginic acid thickly, it is made to dry it, the account metal rod of desiccation back to front is sampled, and a solid emitting smoke object is done. A cylinder almost comparable as the diameter of said solid emitting smoke object 2 is prepared in thin paper. Moreover, an end For example, the slime which closes with the cap made of paper and has said viscosity in it is filled. While the cap made of paper closes the other end of the account cylinder of back to front, making it dry in the condition of having made the cap of both ends penetrating several wires and drawing out the account wire of desiccation back to front, said cylinder can be removed and said solid emitting smoke object can also be formed. In this way, if said band-like object is wound around the end of the manufactured solid emitting smoke object and the band-like object winding section 3 is formed, said solid emitting smoke object 2 will be done. In addition, said solid emitting smoke object 2 may be formed by the medicinal herb and seaweed of MAKU, guarana, a cutlet arbor, and Pfaffia and others, or may be used together with the bone of the natural vegetation of \*\* which processed said mugwort, or perfume nature, and an animal (for example, antler of a deer).

[0008] Said health smoke absorbing object 1 is inhaled with [ for commercial tobacco ] a filter, equips opening with the part of the edge of said solid emitting smoke object 2, or said band-like object winding section 3, attaches fire at a tip, and carries out smoke absorbing of the tobacco in the same way as that of the suck. Smoke is guided to a filter side through said through-hole 4. In addition, if said band-like object winding section 3 is formed with a heat insulator, for example, glass fiber, said part by heat which inhale, and burning of opening stops being able to happen easily and becomes the futility of said solid emitting smoke object 2 can be lessened

more.

[0009] It is the vegetation which said MAKU does not have the side effect which can grow even the mountain range 4000m or more in the Andes with the vegetation of the same Brassicaceae as a Japanese radish, either, and becomes energy enhancement, and the part mainly used is an axial root like a ginseng radix and the hypocotyl which play a role of a storage function part.

[0010] Said guarana is the climbing tree of Sapindaceae produced in the Amazon district, it is said to control the toxicity of the PETA amyloid considered to be the attractant of an Alzheimer disease including matter called a catechin, there is effectiveness in sthenia, nerve sthenia, aphrodisiac, etc., and a leaf and a seed are used.

[0011] Said cutlet arbor grows wild in the vegetation of Erythroxylaceae in the land of the large range of Central American northern part, northeast section, and Midwestern district, and pickles a yellow flower with a with a height [ 1.5m-2m ] shrub. A bark part is mainly used as medical use, and there is effectiveness in aphrodisiac, stomachic, sthenia, etc.

[0012] Said Pfaffia is the medicinal herb of the PURAJIRU specialty which is widely distributed over South America with the vegetation of Amaranthaceae, and is also called the Amazon ginseng radix. The part of a root is used in many cases.
